Home Work 1

🏴 Goal 1. (40 points)

Add The Styles using the Class Name

📋 Task

Create the website, which provides brief information about the planets. The task is:

- *Select all elements with the text class name and apply the color property with the value brown.*

- *Select all elements with the sub-text class name and apply the color property with the value grey.*

🏴 Goal 2. (40 points)

Work with Flexbox

📋 Task

Let's create a blog card. We need to change the default positioning behavior with the help of flex.

The task is to:

- Identify the parent element containing both the post image (img tag with the post-image class name) and post information (div tag with the post-info class name).
- Apply flex properties to the parent element (div tag with the blog-card class name).
- Horizontally center the items within the card.
- Ensure that items cover the entire height of the card.

🏴 Goal 3. (20 points)

Decorative Effects

📋 Task

Let's practice and enhance the visual appeal of the webpage. The task includes:

- Add a shadow to the div element with the class name card. The specified shadow values are rgba(0, 0, 0, 0.3) 0px 19px 38px, rgba(0, 0, 0, 0.22) 0px 15px 12px.
- Add a background image to the div element with the class name card.
- Center the background image within the card.
