Home Work 1

🏁 Goal 1. (40 points)

Add The Styles using the Class Name

📋 Task

Create the website, which provides brief information about the planets. The task is:

- *Select all elements with the text class name and apply the color property with the value brown.*

- *Select all elements with the sub-text class name and apply the color property with the value grey.*

🏁 Goal 2. (40 points)

Variables in CSS

📋 Task

We are tasked with styling a blog web page. The objective is as follows:

1. Define the color in the :root block:

   - Create a variable named --description-color and assign it the value #9e6f21.

2. Apply the --description-color variable as a value of the color property to <p> elements with the class .description.

Looks like this:

Blog
